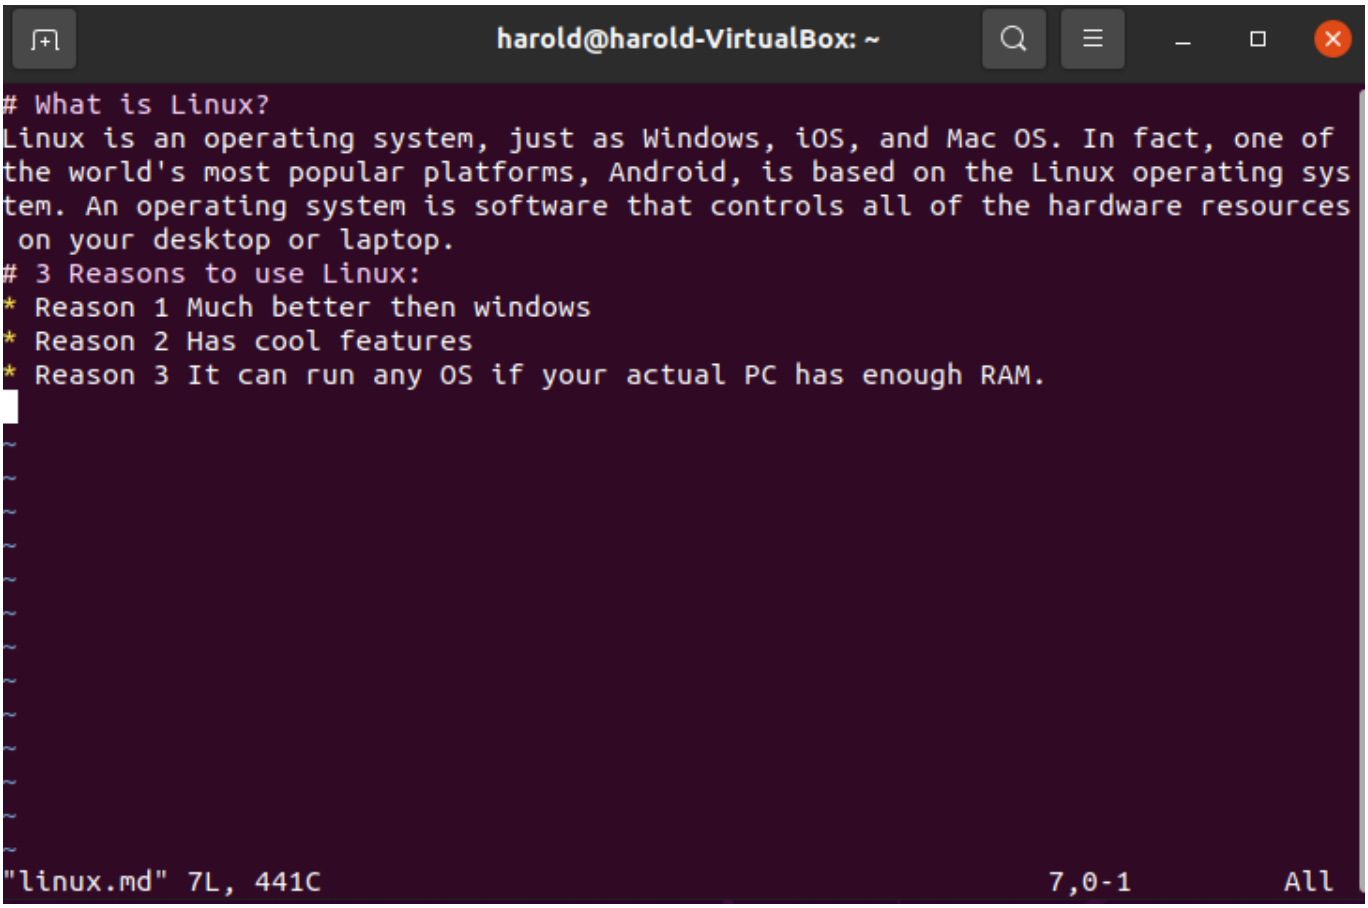
Using VIM



harold@harold-VirtualBox: ~
What is Linux?
Linux is an operating system, just as Windows, iOS, and Mac OS. In fact, one of
the world's most popular platforms, Android, is based on the Linux operating sys
tem. An operating system is software that controls all of the hardware resources
on your desktop or laptop.
3 Reasons to use Linux:
* Reason 1 Much better then windows
* Reason 2 Has cool features
* Reason 3 It can run any OS if your actual PC has enough RAM.
